This version is the second part of a series of articles, which was created by extracting from the original zero version "02NdV1_EN Looking into Universe, Part 1" into a separate part. The effort was to systematically reach stages that would describe the consequences of using a simple model of closed space with constant curvature to describe observations in the space of the Universe as a whole. And order the consequences from simpler to more complex as I found them on my expedition to the distant Universe.

The Abstract Looking into Universe.2 {2NdV.2A_EN} and Summary Looking into Universe.2 {2NdV.2S_EN} are available for this work.
